PROFESSIONAL SUMMARY

Detail-oriented QC Chemist with hands-on experience in chemical and instrumental analysis, ensuring product quality and compliance with industry standards. Skilled in APHA, ASTM, and IS testing methods with strong knowledge of GLP, laboratory safety, and ISO/IEC 17025:2017 documentation.

WORK EXPERIENCE

Chemist May 2025 – Present
Analytical laboratory

- Ensured strict compliance with laboratory safety protocols and standard operating procedures (SOPs).
- Prepared and standardized test solutions, compounds, and reagents for routine laboratory analyses.
- Maintained safe storage, labeling, and handling of chemicals in accordance with safety regulations.
- Water Analysis: Performed water quality analysis including pH, conductivity, turbidity, colour, trace elements, alkalinity, acidity, and hardness.
- Wastewater Analysis: Conducted wastewater analysis such as BOD, COD, oil & grease, TSS, and TDS as per APHA standard methods.
- Food Analysis: Carried out food quality analysis including pH, fat, carbohydrate, moisture content, protein, ash, acid-insoluble ash, acid value, iodine value, volatile and non-volatile oil as per food safety standards.
- Petrochemical Analysis: Performed petrochemical analysis including density, viscosity, distillation range, flash point (PMCC), COC, cloud point, pour point, acid number, and water content by distillation and Karl Fischer titration.
- Calculated cetane index and evaluated properties such as CCR, aniline point, ash content, and density to ensure product performance and regulatory compliance.
- Performed bacteriological analysis using membrane filtration techniques to detect total and fecal coliforms, ensuring public health compliance.
- Assisted in identifying quality issues, troubleshooting analytical problems, and implementing corrective actions.
- Ensured laboratory practices, testing procedures, and documentation complied with ISO/IEC 17025:2017 standards.

EDUCATION

M.Sc Analytical Chemistry 2023 – 2025
[University withheld]

B.Sc Chemistry 2020 – 2023
[University withheld]

SKILLS

- Quick Learner
- Detail Oriented
- LIMS
- Analytical Skills
- Team Work
- Quality Control
- Safety and Compliance
- Problem Solving
- Continuous Improvement
- Communication
- Standard Operating Procedure
- Instrumental Analysis

INSTRUMENTS HANDLED

- Conductivity Meter
- Nephelo Turbidity Meter
- XRD
- UV-Vis Spectrophotometer
- Flame Photometer
- AAS
- Polarimeter
- Colour Difference Spectrophotometer
- pH Meter
- Hegman Gauge
- PMCC Tester
- COC Tester
- CCR Apparatus
- Distillation Unit

PROJECT

Conducted project work on the topic **"Comparative Study of Anatase Grade Pigment and Rutile Grade Pigment and Conversion of Anatase to Rutile at Different Temperatures and Time Using XRD"** at [research organization withheld], India.
